NARRATIVE

The purpose of this survey was to divide my clients' property into the 3 parts shown. My clients purchased this property in November, 1964, per Book 198, Page 716, Benton Co. Deed Records. The description in this document follows the survey and calls to the monuments found and set of CS 4002, filed in October, 1964. I found most of the monuments shown as found or set from this survey and I orient to it.
The right-of-way monuments along the spiral curve of Springhill Drive are shown as found on this 1964 survey. I could only guess as to their origin. I found a Drawing of this roadway in the Benton County Surveyor's Office called Drawing 6B-24-19. This drawing does not show any monuments set along the right-of-way line of the spiral curve, only centerline. I found the monument at the PS and PT and calculated the spiral to fit. I found the monument at the PSC to be 0.32 feet out of position. I found the monument at the PCS lying horizontal and I reset the position as shown.
The source of the Moore rod is a pending survey for Stan Starr, my client's NW'ly neighbor. I acquired a preliminary copy of this survey and found no fault in the rod.
There are 4 monuments set from a previous configuration that I did not pull.

NOTE: Easement to Mountain States Power Company for Line Pole Anchor per Book 86, Page 197, Benton Deed Records.
